

{ SAFsolution™ } ENTERPRISE EDITION

SAFsolution™ Enterprise Edition is a biometric security solution that replaces passwords with biometric authentication, the most reliable form of security on the market. Designed and tested for enterprise-level deployments, SAFsolution tightly integrates with Microsoft® Active Directory®.

ENTERPRISE SECURITY THROUGH BIOMETRIC AUTHENTICATION

SAFsolution will provide your organization with the following benefits:

- **A significant increase in network security**
- **Increased convenience for end users – no more passwords to remember!**
- **Virtually eliminates password –related helpdesk calls**
- **Rapid roll-out and minimal end-user training, thanks to user-friendly Practice Utility and Self-Enroll tool**
- **Long term return on investment, due to open systems standards-based architecture**

SAFSOLUTION FEATURES INCLUDE:

- **A Practice Utility that allows users to practice biometric enrollment and verification prior to activating biometrics security**
- **Fast Logon, an optional feature that replaces the network login window with a biometric authentication window. Simply scan and go!**
- **Decreased administrator time with features like Self-Enroll, which allows users to establish a biometric account on their workstation without administrative assistance**
- **Disconnected Login, which lets users log on to their workstation in the absence of a network connection while maintaining the security of their account**

PROVIDING FLEXIBILITY & SCALABILITY FOR YOUR ENTERPRISE

SAFsolution works with a wide variety of biometric hardware devices, such as fingerprint, voice, iris and facial recognition devices (available separately from SAFLINK), to provide you with the most flexible solution for your enterprise. SAFsolution can also be integrated with smart cards, RF badges, and a number of other identification tokens.

SAFLINK® AND MICROSOFT® ACTIVE DIRECTORY®

SAFsolution™ Enterprise Edition tightly integrates with Microsoft® Active Directory® to allow administrators to secure network and workstation access. Active Directory, which is an essential component of the Windows 2000 architecture, presents organizations with a directory service designed for distributed computing environments. Active Directory allows organizations to centrally manage and share information on network resources and users while acting as the central authority for network security.

THE PRODUCT

SAFsolution™ Enterprise Edition

Biometric security solution for Windows® workstations and domains

SYSTEM REQUIREMENTS

SERVER

Pentium II 450 MHz
256 MB RAM
100 MB Hard Disk Space
Windows 2000 Server, Advanced Server or DataCenter Server
Windows Active Directory 2000
High Encryption Pack

CLIENT

Pentium I 120 MHz
64 MB RAM
64 MB Hard Disk Space
Windows NT 4, 2000 or XP Professional

BIOMETRIC HARDWARE DEVICES

Fingerprint

SecuGen (Mouse)
SecuGen (Stand Alone)
SecuGen (Keyboard)
Veridicom (Stand Alone)
Startek (Stand Alone)
Kensington (Stand Alone)
DreamMirh (Mouse)
Key Source (Keyboard)
Precise (Keyboard)
Precise (PCMCIA Card)
Precise (Stand Alone)
LifeView (Stand Alone)
STMicroelectronics (Touch Chip)
Targus (Stand Alone)
Targus (PCMCIA Card)
Zvetco (Stand Alone)
Zvetco (Keyboard)

Facial Image Recognition

Visionics

Speech Verification

ScanSoft

Iris Recognition

Oki (Japan Only)
Panasonic

NEED SINGLE SIGN-ON?

Do you need to integrate your biometric security solutions with a number of client-server applications? SAFLINK's partnership with leading Single Sign-on (SSO) providers extends the simplicity of biometrics to the application level.

ADDITIONAL SAFLINK PRODUCTS

SAFmodule™ for Novell® NMAS™
SAFaccess for CA eTrust™ SSO
SAFremote Authenticator for Citrix®
